

Destpeka V-Card is a comprehensive SaaS digital business card platform developed for **Destpeka Digital Business Development**. It enables professionals and businesses to create stunning digital vCards with a complete ecosystem: NFC card integration with physical card ordering, an online store builder, appointment scheduling, service booking, payment links, and visitor analytics. Supporting **16+ payment gateways** for subscriptions and NFC orders, custom domain publishing, and a built-in referral system — it delivers a complete digital identity solution in one platform.

◆ SIGNATURE FEATURES

Smart vCard Builder

10+ customizable sections — social links, payment links, services, products, image galleries, testimonials, popups, business hours, appointment booking, and contact forms. Advanced SEO settings, custom themes with CSS/JS editing.

NFC Card Ecosystem

Design custom NFC cards, generate unique keys, link vCards to physical chips, order NFC cards online with 16+ payment options, write directly to NFC chips, greeting letters, and a complete NFC transaction management system.

vCard Store Builder

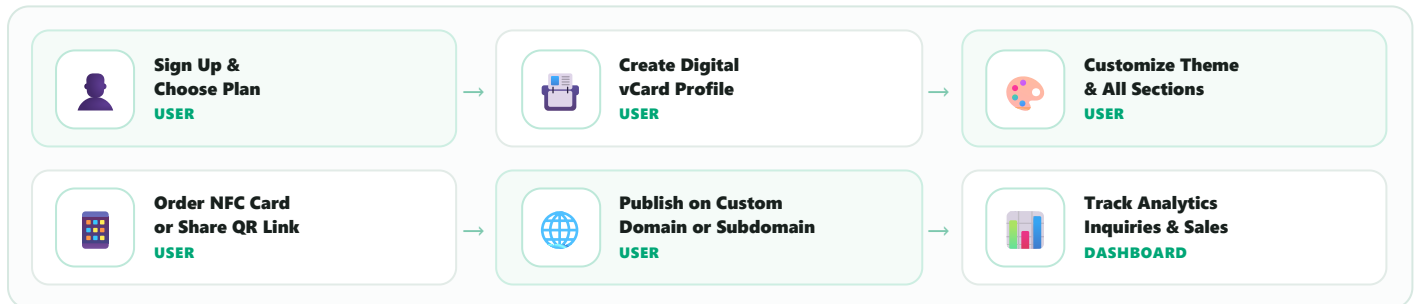

Transform any vCard into a full online store — product catalog with categories, shopping cart, checkout flow, order management, invoices, product import/export, store policies, and custom domain or subdomain publishing.

Multi-Tenant SaaS

Subscription plans with 16+ gateways (Stripe, PayPal, Razorpay, Mollie, Paystack, Xendit, MercadoPago & more), custom domains with Cloudflare rules, referral system with withdrawals, marketing campaigns, and full admin control.

◆ USER JOURNEY
